PRINCE KUMAR

+91-8294584119 | princekumarkha2005@gmail.com | 🔗 LinkedIn | 🔗 Greater Noida, Uttar Pradesh

PROFESSIONAL SUMMARY

Enthusiastic and detail-oriented MERN stack web developer with hands-on experience in building scalable full-stack applications using MongoDB, Express.js, React.js, and Node.js. Proven ability to develop RESTful APIs, implement JWT authentication, and create responsive user interfaces with modern design practices. Passionate about cybersecurity and secure coding practices, with a strong foundation in problem-solving, team collaboration, and modern development workflows. Eager to contribute to dynamic development teams and innovative projects.

EDUCATION

Bachelor of Engineering in Computer Science Engineering
Noida Institute of Engineering and Technology (NIET), Greater Noida
Current GPA: 8.1 / 10
Key Coursework:

- Cybersecurity, Data Structures and Algorithms, Web Development, Database Management Systems
- Gained strong practical and theoretical knowledge in full-stack development and ethical hacking.
- Engaged in multiple project-based learning experiences involving secure web technologies.

CERTIFICATIONS

- MERN Stack Web-Development
- Cisco Networking Academy – Introduction to Cybersecurity
- Cisco Networking Academy – CCNA: Introduction to Networks
- Infosys Springboard – React.js Certification

PROJECT EXPERIENCE

E-Book-Management-App | May 2025 – July 2025
Tech Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Developed a fully functional **MERN-based e-book management system** with category-based classification.
- Built **RESTful APIs** to support **Create, Read, Update, and Delete (CRUD)** operations with secure access.
- Implemented **image upload functionality** and integrated MongoDB with Mongoose for backend data handling.
- Designed a **responsive React.js frontend** with a **dark/light mode toggle** using Tailwind CSS.

HydroTrim – Water-Borne Disease Surveillance Platform
Tech Stack: React 18, Tailwind CSS, Recharts, Framer Motion, Node.js, Express.js, MongoDB, Mongoose, JWT

- Built a **MERN-based** real-time monitoring system for **cholera, typhoid, and dengue outbreaks**.
- Developed **role-based dashboards** (User, Hospital, Admin) with data visualization and responsive UI.
- Implemented **MongoDB Change Streams** to trigger instant **SOS alerts** on case spikes.
- Designed **modular disease APIs** with integrated historical datasets (2021–2025).
- Added **multilingual (EN/HI)** support using Context API and localStorage.
- Implemented **JWT authentication**, protected routes, and **RBAC** for secure access.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, HTML, CSS
Frontend: React.js, Redux, Bootstrap, Responsive Web Design
Backend: Node.js, Express.js, MVC Architecture
Databases: MongoDB, Mongoose, MySQL
Authentication: JWT, Role-Based Access Control
Tools & Technologies: REST APIs, CRUD Operations, Git, GitHub, Postman, Vite, VS Code, NPM, Wireshark, John the Ripper, Steganography Tools, Zphisher
